3rd International Symposium
"NETWORKS FOR MOBILITY 2006"

Proceedings

The papers of the lectures and the posters of the symposium are published in the Proceedings, which include the printed abstracts of the contributions as well as the full versions published on CD-Rom. The Proceedings can be ordered by e-mail: fovus@fovus.uni-stuttgart.de.

Price: EUR 20,00 plus shipping costs.

Contents

Opening Lecture
Technological progress and globalization
Michael Jischa (President of the German Association for the Club of Rome / Clausthal University of Technology, Germany)

Plenary Session I – Environmental and Economic Impacts of Transport
Mobility in an integrating Europe: sustainable development and cohesion
Roger Vickerman (University of Kent, United Kingdom)

Vehicles and propulsion concepts for low energy consumption
Horst Friedrich et al. (German Aerospace Center – Institute of Vehicle Concepts, Stuttgart, Germany)

Transport system and metropolitan cities: Changing morphology of peripheries with special reference to India
Amitabh Kundu (Jawaharlai University, New Delhi, India)

Plenary Session II – Public Transport
Planning and innovative contracting of major Dutch railway projects as part of the European transportation network
Ingo Hansen (Delft University of Technology, Netherlands)

Supporting strategy development at Deutsche Bahn AG with transport models
Boris Krostitz (Deutsche Bahn AG, Frankfurt am Main, Germany)

Analysing and optimising public transport supply
Markus Friedrich (Universität Stuttgart, Germany)
**Plenary Session III – Sustainable Transport**

Energy and environment – extraordinary challenges to create a sustainable transportation system

_Daniel Sperling (University of Davis, California, USA)_

Impacts of rising energy prices on urban structures – challenges for policy making

_Michael Wegener (Spiekermann & Wegener, Dortmund, Germany)_

How can advanced traffic telematic systems contribute to more sustainable mobility

_André Vits (European Commission – Directorate General Information Society and Media, Brussels, Belgium)_

---

**Parallel Session I A – Network Planning and Evaluation**

Implementation of EU transport policy – new members states’ point of view

_Monika Bak, Barbara Pawlowska (University of Gdansk, Sopot, Poland)_

Optimisation and evolution of transportation networks

_Rupert Bobinger (TRANSVER GmbH, Munich, Germany)_

The choice problem in the mega projects evaluation

_Alessandra Libardo (IUAV University of Venice, Italy)_

Systematic analyze of tools aimed to enhance transit ridership

_Dan Rader (Institute for Transportation Planning & Research, Tel Aviv, Israel)_

---

**Parallel Session I B – Traffic Guidance and Control**

A new method for offset optimization evaluation with respect to environmental issues

_Bernhard Friedrich, Essam Almasri (University of Hannover, Germany)_

A way to quality assured road data for a speed alert system

_Thomas Wiltschko et al. (Universität Stuttgart / PTV AG, Karlsruhe, Germany)_

COMO - A new way of organizing the control of variable message signs

_Thomas Sachse, Axel Hager (Siemens AG, Munich / VIA Beratende Ingenieure, Berlin, Germany)_

INTREST - intermodal referencing system for transport related data

_Peter Pollesch (Board of building and public works in the Bavarian ministry of the interior, Munich, Germany)_

---

**Parallel Session I C – Emission-Reduced Mobility**

Impacts of selected transport measures on atmospheric pollution from urban road transport in Czech cities

_Hana Bruhova-Foltýnová, Jan Bruha (Charles University Environment Centre, Prague, Czech Republic)_
Ecological assessment of mobility behaviour
Sylvie Grischkat, Marcel Hunecke (University of Lüneburg / Ruhr-Universität Bochum, Germany)

The transformation of car sharing - good or bad news? Examining ecological effects of the diffusion of car-sharing in Germany
Georg Wilke, Daniel Bongardt (Wuppertal Institute for Climate, Environment and Energy, Germany)

Evaluating the Safety issues of Pedestrians in Dhaka City, Bangladesh
Khan Rubayet Rahaman, Sadia Afrin (Khulna University, Bangladesh / Royal Institute of Technology, Stockholm, Sweden)

Parallel Session II A – Transport Costs and Infrastructure Pricing
An approach for the determination of the optimal fare for the car sharing service
Salvatore Amoroso et al. (University of Palermo, Italy)

Consideration of environmental costs in a harmonised European approach for transport project assessment
Peter Bickel, Rainer Friedrich (Universität Stuttgart, Germany)

Potential influence of city pricing (downtown toll) for private transport in Germany on travel behaviour
Verena Franken, Clemens Bochynek (German Aerospace Center – Transport System Analysis, Berlin, Germany)

Rail infrastructure charges in Europe - principles and practice
Chris Nash (University of Leeds, United Kingdom)

Parallel Session II B – Transportation Guidance and Evaluation
Evaluation of floating car data systems by field trials
Elmar Brockfeld et al. (German Aerospace Center – Transport Information Science, Berlin, Germany)

Train guidance in congested networks
Andreas Oetting (Deutsche Bahn Netz AG, Bad Homburg, Germany)

Advanced incident management in public transport by integration of geo data
Stefan Tritschler et al. (Universität Stuttgart, Germany)

Intelligent system of operational planning of supply chain for small 30 and medium enterprises (SME)
Alexander Grakovski et al. (Transport and Telecommunication Institute, Riga, Latvia)

Parallel Session II C – Travel Behaviour and Acceptance
Demographic development and mobility patterns: activity spaces of elderly people in Germany yesterday, today and tomorrow
Michael Dalaker, Torsten Luley (Explanandum GmbH, Stuttgart, Germany)

Modelling the individual activity scheduling and rescheduling process and its empirical foundation
Heike Mühlhans (Hessisches Landesamt für Straßen- und Verkehrswesen, Frankfurt am Main, Germany)

An investigation of traveller behaviour towards electronic road pricing by a stated preference survey
Mak Keng Seng et al. (Land Transport Authority of Singapore)

Traffic impacts of informational multi-channel behaviour
Felix Schiffner et al. (Universität Stuttgart, Germany)

Parallel Session III A – Public Transport Infrastructure
Monitoring of interoperability on the Trans-European railway network
György Bessenyei (Budapest University of Technology and Economics, Hungary / European Railway Agency, Valenciennes, France)

A "low-brow" approach on assessing the upgrading need of railway sections
Haldor E. Jochim, Antje Oetting (Aachen University of Applied Sciences / Deutsche Bahn Netz AG, Frankfurt am Main, Germany)

Rail network for mobility and city planning: the case of Naples
Enrica Papa, Francesca Pagliara (University of Naples Federico II, Italy)

Modelling bus priorities in motorcycle environment using Saturn
Minh Tranhuu (University of Leeds, United Kingdom)

Parallel Session III B – Traffic Modelling and Forecasting
Online traffic state estimation and incident detection
Stefan Horter et al. (Universität Stuttgart, Germany)

Statistics of extremes, traffic jams and natural disasters
Reinhart Kühne (German Aerospace Center – Transportation Studies Group, Berlin, Germany)

The interaction of dynamic navigation and the traffic state in urban areas
Irina Matschke (Blaupunkt GmbH, Hildesheim, Germany)

Improving the safety on highways with telematic instruments
Christian Adams (Berlin University of Technology, Germany)

Parallel Session III C – Integrated Spatial and Transportation Planning
Discussion about pathways to and from transit stops
Karin Berg (Chalmers University of Technology, Gothenburg, Sweden)
Assessing sustainability in Switzerland: The Federal Sectoral Transport Plan
Pietro Cattaneo (Federal Office for Spatial Development, Bern, Switzerland)

The fragmentation of industrial value chains and its impacts on freight transport and transport for commercial services
Barbara Lenz et al. (German Aerospace Center – Transport System Analysis, Berlin, Germany)

Household car ownership in relation to residential and work location
Kees Maat, Harry J.P. Timmermans (Delft University of Technology / Eindhoven University of Technology, Netherlands)

Abstracts of Posters

Travel and User Behaviour
Towards a dynamic traffic assignment as an application in Ubiquitous Computing
Bruno Arbter et al. (Universität Stuttgart, Germany)

The impact of road projects on the poor and vulnerable: Integrating a socio-economic impact assessment methodology in road system transport planning
Betty Babirye Ddungu (Ministry of Transport and Works, Kampala, Uganda)

The role of public transport in passenger transport system in Poland
Anna Mezyk (Politechnika Radomska, Radom, Poland)

Upgrading the information system for public transport management based on the user’s preference
Vladimir Momcilovic et al. (University of Belgrade, Serbia)

Pilot inquiry about employees’ and students’ travel behaviours at Cracow University of Technology
Katarzyna Nosal (Cracow University of Technology, Poland)

Approach of the inequality of urban mobility: the case study of Oran’s peripheral
Fafa Rebouha (University of Sciences and Technology of Oran, Algeria)

Infrastructure and Network Planning
The role of transport network modelling in the mobility management
Zsolt Berki (TRANSMAN Ltd, Budapest, Hungary)

A new approach to assess road and rail measures - The Integrated Master Plan of North Rhine-Westphalia
Robert Burg et al. (Kessel & Partner, Freiburg / PTV AG, Karlsruhe, Germany)
New rules of transport infrastructure development programming in Poland after the European Union accession
Jan Burnewicz, Elżbieta Adamowicz (University of Gdansk, Sopot, Poland)

Forecasting rail/road traffic demand in Italy through economic parameters
Agostino Cappelli et al. (University IUAV of Venice, Italy)

An estimate of change in cycling demand and its use in cost-benefit analysis: a case study of the cycling network in Pilsen
Hana Foltýnová, Markéta Braun Kohlova (Charles University Environment Centre, Prague, Czech Republic)

Procedure development for the activity based costing method implementation within the public utility fleet
Aleksandar Manojlovic et al. (University of Belgrade, Serbia)

Benchmarking subsidised public transport services
Johannes Schlaich, Gerd Schleupen (Universität Stuttgart, Germany)

A redesign of the Dutch road network
Maaike Snelder et al. (Delft University of Technology, Netherlands)

Traffic Control and Telematics
Investigation of empirical pedestrian traces for calibrating microscopic mobility models
Florian Bitzer et al. (Universität Stuttgart, Germany)

Simulation tool for reliability analyse of complex telematics systems with parallel fault development
Igor Kabashkin (Transport and Telecommunication Institute, Riga, Latvia)

VAMOS - The Dresden operational traffic management system
Matthias Körner (Dresden University of Technology, Germany)

Public transport dispatching control system in MPK in Krakow
Tomasz Kulpa (Cracow University of Technology, Poland)

MOVIMAN - Mobility management in commercial and industrial areas
Emilio Merino et al. (Universidade Federal do Rio Grande do Sul, Porto Alegre, Brasil)

Integration of public and private transport modes mobility information
Meinte A. Wildschut (EDS, Utrecht, Netherlands)

Generating of floating phone data for traffic flow optimization
Thomas Wiltschko et al. (Universität Stuttgart, Germany)
Transportation and Environment
A proposal of a qualitative evaluation matrix for transport infrastructure
Barbara Badiani, Elisa Di Dio (Università degli Studi di Brescia, Italy)

MOVILIZATION: Keeping cities accessible by promoting bicycle use (EU URBAL B Project)
Ton Daggers et al. (International Bicycle Consultancy, Utrecht, Netherlands)

The modelling of environmental impact of selected planned transport measures in the city of Brno
Jiri Dufek et al. (Transport Research Centre, Brno, Czech Republic)

"mobil.punkt" - Integration of car-sharing into urban regeneration
Michael Glotz-Richter (City of Bremen, Germany)

A spatial methodology to evaluate transportation projects
Dan Rader (Institute for Transportation Planning and Research, Tel Aviv, Israel)

ACTMP - ArRiyadh Comprehensive Traffic Management Plan
Ulf Schulte, Manfred Wacker (Dornier Consulting, Friedrichshafen / Universität Stuttgart, Germany)

Transportation networks and networks for wildlife mobility: GIS-based methods and analyses
Hans-Georg Schwarz-von Raumer et al. (Universität Stuttgart, Germany)
