

Schedule

Time	Wednesday, September 29, 2010 *	Thursday, September 30, 2010 (SpOrt Stuttgart)	Friday, October 1, 2010 (SpOrt Stuttgart)
08:00			Registration starts at 08:00
09:00	Registration starts at 09:00	Registration starts at 08:00	Plenary Session II
09:30	Tutorials	Opening	
	Positioning and Map Matching for Traffic Application (1/3)	Introduction and Opening Lecture	Future of High-speed Ground Transport
	Evaluation of Urban Transportation Investments (1/3)	Coffee Break (10:30 – 11:00)	Coffee Break (10:30 – 11:00)
10:30	Innovative Approaches to Railway Capacity Analysis (1/3)	Plenary Session I	Parallel Sessions III
11:00	Coffee Break (11:00 – 11:30)		Public Transport II
11:30	Tutorials	Sustainable Mobility in Metropolitan Regions	Traffic State Estimation
	Positioning and Map Matching for Traffic Application (2/3)	Lunch (12:30 – 14:00)	Transport and Energy
	Evaluation of Urban Transportation Investments (2/3)		Lunch (12:30 – 13:30)
12:30	Innovative Approaches to Railway Capacity Analysis (2/3)		Plenary Session III
13:00	Lunch (13:00 – 14:00)		
13:30			
14:00	Tutorials	Parallel Sessions I	
	Positioning and Map Matching for Traffic Application (3/3)	User Behaviour	Route Choice and Traffic Assignment
	Evaluation of Urban Transportation Investments (3/3)	Driver Assistance	
15:00	Innovative Approaches to Railway Capacity Analysis (3/3)	Electric Mobility	Final Discussion
15:30		Coffee Break (15:30 – 16:00)	
16:00	* = The Tutorials will be NOT held at SpOrt Stuttgart. The Tutorial locations will be separately announced after submitting your registration form.	Poster Session	
		Transportation System Planning Traffic Control and Telematics Transportation and Environment	
17:00		Parallel Sessions II	
		Public Transport I	
		Traffic Signals	
		Integrated Transport	
18:30		Reception starts at 18:30 (SpOrt Stuttgart, Atrium)	
19:00		Banquet starts at 19:00 (SpOrt Stuttgart, Atrium)	

Contents

	Page
Opening Lecture	
Planning Mobility (Transition to Sustainable Mobility in Metropolitan Regions: Which Theories and Practices could help?) <i>Luca Bertolini (AMIDSt, Amsterdam, Netherlands)</i>	1
Plenary Session I – Sustainable Mobility in Metropolitan Regions	
Prominent Transportation Planning and Policies in Portland, Oregon, USA <i>Andrew Cotugno (Oregon Metro, Portland, Oregon, USA)</i>	2
Presentation of the Cheonggyecheon Project in the City of Seoul Comprehensive traffic management plan <i>Paul Ma (Seoul Metropolitan Government, Republic of Korea)</i>	3
Smarter Cities: Improving Mobility through Anticipation <i>Steffen Schaefer (IBM Deutschland GmbH, Munich, Germany)</i>	4
Plenary Session II – Future of High-speed Ground Transportation	
Prospects and Limitations of High-speed Ground Transportation Systems: The Maglev-Option <i>Johannes Klühspies (Deggendorf University of Applied Sciences, Germany)</i>	5
Market conditions for intercity rail/maglev - Maglev Developments in the USA <i>Laurence E. Blow (Maglev Transport, Inc., Arlington, Virginia, USA)</i>	7
The Opportunity of MagLev in Respect to the Upcoming Mega Events in Brazil <i>Richard Stephan (Federal University of Rio de Janeiro, Brazil)</i>	8
Plenary Session III – Route Choice and Traffic Assignment	
Route Choice in Road Networks - Observing and Modelling Route Choice <i>Markus Friedrich (University of Stuttgart, Germany)</i>	9
Static Traffic Assignment - What is a Good Assignment? <i>Hillel Bar-Gera (Ben Gurion University of the Negev, Beer-Sheva, Israel)</i>	10
Dynamic Traffic Assignment - Can Dynamic Models Offer More? <i>Guido Gentile (Sapienza University of Rome, Italy)</i>	12

Parallel Session I – User Behaviour

Time Perceptions on the Urban Mobility System - 13
The Case of the Lausanne-Morges Agglomeration
Susana Limão (Federal Technical University of Lausanne, Switzerland)

Senior Citizens Mobility in the Future 14
Ralf Risser (FACTUM OHG, Vienna, Austria)

A Travel Choice Prediction Model Based on Fuzzy-Random Utilities 15
Giuseppe Longo (Technical University of Bari, Italy)

Integration of Individual Travel Behavior and Micro-Simulation 16
Michael Balmer (Federal Technical University of Zurich, Switzerland)

Parallel Session I – Driver Assistance

Vehicular Assistance Applications in the Scope of Kerner's Three-Phase 17
Traffic Theory
Jochen Palmer (IT-Designers GmbH, Esslingen, Germany)

Realisation of electronically coupled Truck Platoons on German Highways 18
Christian Lank (RWTH University, Aachen, Germany)

Two-Level Approach for Evaluation of Advanced Driver Assistance Systems 19
Stefan Detering (Technical University of Braunschweig, Germany)

pVID an innovative personalised Traffic Information Service for road users 20
Rico Möbius (Institut für Automation und Kommunikation e. V. Magdeburg, Germany)

Parallel Session I – Electric Mobility

Electric Mobility in Austria - Model regions and national strategy 21
Robert Thaler (Federal Ministry of Agriculture, Forestry, Environment and Water Management, Vienna, Austria)

Potentials of electric mobility in Germany and the US on the basis of car 23
movement patterns and car immobilisation time patterns
Torsten Luley (Explanandum – Gesellschaft für empirische Sozialforschung mbH, Stuttgart, Germany)

Electric Mobility 24
Petra Schäfer (Frankfurt/Main University of Applied Sciences, Germany)

Smart e-Mobility Solutions 26
Stefan Schumacher (IBM Deutschland GmbH, Hamburg, Germany)

Parallel Session II – Public Transport I

- Public Transport Service Development from conventional to flexible: 27
A Way to reduce Operating Costs and increase Service in Low Demand Areas
Marco Amadori (SRM - Reti e Mobilità SpA Bologna, Italy)
- Automatic Timetable Modification for Entire Networks 28
Andreas Oetting (DB Netz AG Frankfurt/Main, Germany)
- An Approach Proposal for Evaluation of Transit Reliability Performances 29
Antonio Lugarà (Mediterranea University of Reggio Calabria, Italy)
- Simulation-based Hybrid Model for Automatic Dispatching of 30
Rail-Guided Operation
Yong Cui (University of Stuttgart, Germany)

Parallel Session II – Traffic Signals

- Model-based Online Control of Signalized Networks 31
with Emphasis on Offset Optimization
Tobias Pohlmann (Technical University of Braunschweig, Germany)
- PRIORITY-optimized PRIORITY-management for public transport at 32
traffic lights using vehicle2infrastructure Technology
Hanfried Albrecht (AlbrechtConsult GmbH, Aachen, Germany)
- Operating Conditions of On-Board Displayed Dynamic Green Wave 34
Speeds via V2I-Communication
Thomas Otto (University of Kassel, Germany)
- Estimating Daily Curves of Queue Length at Traffic Signals using 36
Floating Car Data
Thorsten Neumann (German Aerospace Center Berlin, Germany)

Parallel Session II – Integrated Transport

- The future of Rural Mobility: Necessity, Affordability, and Implementation of an 37
Integrated Planning for Rural Road Networks
Rinus Jaarsma (Wageningen University, Netherlands)
- Green Mobility - Corporate Sustainable Mobility 39
Lincoln Paiva (Green Mobility, São Paulo, Brazil)
- Inequalities of Transportation Supply and Access Difficulties in 40
Oran Metropolitan Area
Fafa Rebouha (University of Sciences and the Technology of Oran, Algeria)
- Integrated Approaches for an Energy-Efficient City – The Shanghai Project 41
Alexander Schmidt (University of Duisburg-Essen, Germany)

Parallel Session III – Public Transport II

- Rail Infrastructure Charges – Reconciling the conflicting Objectives 43
Chris Nash (University of Leeds, United Kingdom)
- The influence of High Speed Rail on residential property prices:
Hedonic estimates from England 44
Francesca Pagliara (University of Naples Federico II, Italy)
- The Planning Process in Practice and Dealing with Public Criticism –
A Case Study from the Stuttgart Light Rail System 46
Volker Christiani (Stuttgarter Strassenbahnen AG, Germany)
- MOBI-KID - How to provide Mobility related Information of Public Means
according to Children's Needs 48
Christine Chaloupka-Risser (FACTUM OHG, Vienna, Austria)

Parallel Session III – Traffic State Estimation

- Deriving Travel Times in Road Networks using Bluetooth-based Vehicle
Re-identification: Experiences from Northern Bavaria 49
Matthias Spangler (Technical University of Munich, Germany)
- UVM-BS Environmental oriented Traffic Management Braunschweig 50
Gustav Thiesing (BLIC GmbH, Braunschweig, Germany)
- Traffic State Estimation in Urban Networks: A Simulation-Based Approach 51
Carsten Kemper (GEVAS software GmbH, Munich, Germany)
- Evaluation of AZTEK: a robust Traffic State Estimation and
Incident Detection Algorithm 52
Martin Schober (University of Stuttgart, Germany)

Parallel Session III – Transport and Energy

- Calculation of the Energy Consumption for the Construction of a Railway Tunnel 53
Silvio Nocera (University of Venice, Italy)
- Planning Algorithm for Analyzing the Effect of City-Form on Transportation
Characteristics and Pollution-Emission Based on Israeli Data 54
Rachel Katoshevski-Cavari (Ben-Gurion University of the Negev, Omer, Israel)
- Meeting the Challenge of Global Change: The Urgent Need for Strong User
Alliances to Build Demand Amongst Cyclists, Walkers and Public Transport
Users for Sustainable Transport 56
Lake Sagaris (Centro de Urbanismo Ciudadano, Santiago, Chile)
- Built Environment and Car Travel, comparison of the Netherlands with its peers 57
Kees Maat (Delft University of Technology, Netherlands)

Abstracts of Posters

Transportation System Planning

The Econometric Estimation of the Value of Time in the Czech Republic 58
Hana Bruhova-Foltynova and Jan Bruha (Kolin Institute of Technology, Czech Republic)

Mobility Pattern and Accessibility of Physically Challenged People to Transport System: A Study on Dhaka City, Bangladesh 59
Abul Baker Md. Touhid (Planning Division, Ministry of Planning, Dhaka, Bangladesh)

Park and Ride infrastructural Provision: A missing Link in Mobility Management in Metropolitan Lagos, Nigeria 60
Joshua A. Odeleye (Lagos State University, Nigeria)

Unequal Mobility in Santiago de Chile: The Impact of Social Housing Location 61
Fernando Jimenez-Cavieres (NGO Cordillera, Santiago, Chile)

Network Operating Plans and Performance Targets 62
Andrew Somers (VicRoads, Network and Asset Planning, Kew, Australia)

Learning from the Implementation Process of CIVITAS II Measures – Evidence from a standardised process evaluation 64
Roman Klementschtz (University of Natural Resources and Applied Life Sciences, Vienna, Austria)

An alternative Methodology for urban Transportation System Planning 66
Walber Paschoal da Silva (Fluminense Federal University, Niterói, Brazil)

Public Risk in Transport Infrastructure Projects – The Case of Public Guarantees in Polish Motorways Construction Programme 67
Przemyslaw Borkowski (University of Gdansk, Poland)

Bus Rapid Transit Success Factors 69
Richard Mejía (Daimler Buses Bus Rapid Transit Transport Planning, Stuttgart, Germany)

Traffic Control and Telematics

Ultralight Vehicles: Non-linear Correlations Between Weight and Safety 70
Mike Simpson (Rocky Mountain Institute, Boulder, Colorado, USA)

Route Choice Set Generation in Road Networks 71
Eileen Mandir, Juliane Pillat (University of Stuttgart, Germany)

Traffic Injuries in Rural Highways: An Evaluation Model of South-Western Part of Bangladesh 72
Khan Rubayet Rahaman (Khulna University, Bangladesh)

Quality Management for a Road Safety Feature Exchange Infrastructure <i>Rainer Schützle (University of Stuttgart, Germany)</i>	73
Refinement of Urban Traffic State Estimation by using Queue Length Information <i>Claudia Dittrich (Technical University of Munich, Germany)</i>	74
The Use of Traffic Information Systems for the Public Transport <i>Katja Johänning (RWTH University, Aachen, Germany)</i>	75
Safety Analysis Platform for Railway Transport <i>Stefan Wegele (Technical University of Braunschweig, Germany)</i>	76
Simulators, CBT, Role Plays, and Practical Training: How Integrated Drivers' Training Makes Public Transport More Sustainable <i>Reinhold Schröter (Stuttgarter Strassenbahnen AG, Germany)</i>	77
Transportation and Environment	
Beautification Arrangements of an Urban Road: City Beautification Perspective <i>Sohel Rana (University of Hawaii at Manoa, Honolulu, Hawaii, USA)</i>	79
Public Transport Network Change and Social Exclusion: the case of Belfast City <i>Syed M A Bukhari (University of Ulster, Newtownabbey, United Kingdom)</i>	80
Learning for Sustainable Mobility - Transforming the way we create transport policies <i>Pieter Schrijnen (Delft University of Technology, Netherlands)</i>	81
Afro-green Urban Community: The Case of Integrating Sustainable Mobility Management in a Fractal Urban Settlement of sub-Saharan Africa <i>Alexander Boakye Marful (University of Stuttgart, Germany)</i>	82
Spatial Studies for Electric Mobility <i>Felix Bachofer (University of Tübingen, Germany)</i>	83
Simulating the Market Development of Battery Electric Vehicles <i>Joerg Wansart (Technical University of Braunschweig, Germany)</i>	85
New metropolitan Processes facilitated by HSR Mobility <i>Vicente Romero Avila (University of Castilla-La Mancha, Ciudad Real, Spain)</i>	86
