Computational discourse quality analysis: using machine learning to under- stand online political deliberations

**Dr. Eléonore
Fournier-Tombs**

McGill University

This talk presents a framework for the automated analysis of political deliberations on social media and in blogs, allowing us to understand discourse quality online. Dr. Fournier-Tombs will present a theoretical overview of the digital public sphere and the growing importance of evaluating the quality of citizen discourse online. She will then explain the technical components of implementing machine learning classification and clustering techniques to answer these questions.

Dienstag, 6. November 2018

10:30 – 12:00 Uhr,

Breitscheidstraße 2, 4. OG, Raum 4.06

Alle sind herzlich eingeladen!
