Project Information

Institute's Information

Name of Institute	Institute for Chemical Process Engineering
Contact Person	Andrej Grabowski
Phone	+49 711 685 85234
e-mail	andrej.grabowski@icvt.uni-stuttgart.de

Duration of Project/Number of Students

June/July	
June/July/August	both possible
Number of Students	2

Name of Project Novel membranes and devices for water purification

Beneficial Skills & Knowledge Chemical Engineering; Plastics Engineering; Polymer Chemistry; Physical Chemistry, or similar

Description of Work

Institute for Chemical Process Engineering develops new concepts of membrane reactors for further realization in industrial products. We innovate using advanced materials and manufacturing techniques.
For energy-efficient removal of salt from water or other liquids we are developing a new membrane and device.
The tasks in this project will be:

- Manufacturing membranes from different recipes.
- Developing a test method for characterization of the membranes.
- Assembling of the membrane device.
- Experimental evaluation of the prepared membrane device for desalination purpose.

For those who are willing to unleash creativity, get responsability and act hands-on!
You're welcome to join our team and actively participate in an exciting technology and product development.
