

Regulations on the purchase of surface disinfectants

A disinfectant for disinfecting surfaces up to 2 m² will be supplied. It contains 80% ethanol, is flammable, and irritates the eyes. It is not recommended to disinfect your hands with this product.

How do the institutes get disinfectants?

1. Please contact the Safety Department (Michael Rannenberg, +49 711 685-63027 via [e-mail](#)).
2. Designate a contact person who shall be authorized to receive disinfectants for your institute.
3. An empty 5 l canister will be handed over to the contact person after a date has been arranged.
4. The contact person can go to the chemical dispensary of the [Institute of Organic Chemistry \(Pfaffenwaldring 55\)](#) and fill the canister with disinfectant.
5. If the institute is not yet listed, an account will be set up and the disinfectant will be accounted for.
6. If necessary, empty canisters will be refilled.
7. It is not permitted to transport full canisters by public transport. Private vehicles or company cars can be used during the Corona crisis.

An [operating instruction in accordance with Section 14 of the Ordinance on Hazardous Substances](#) is centrally available (also the [auxiliary translation for English speaking persons](#)). There are also [downloadable labels](#) that can be printed and affixed to containers into which the disinfectant is transferred.

How do parts of the central administration get disinfectants?

Parts of the central administration (e.g., departments, staff units) can also obtain their disinfectant from Michael Rannenberg (+49 711 685-63027 or by [e-mail](#)), who acts as intermediary here. Each part of the central administration can designate a contact person.
