MODULE REGISTRATION BSc MSV & MSc CL

Most important for today :)

Be(come) aware of

- the '**degree program terminology**'
- and the **course-module mappings** for all your courses!

A. Catalogs vs. modules vs. courses

[-] [976-2024] Computational Linguistics 📖

B. Important: course-module mapping

(Project Seminar CL)

courses show SWS = SSt = SH = weekly hours per semester
(2SWS = 90 min., 1 slot/week)

modules show ECTS CP (usually 2SWS=3CP)

For which modules can your course be used?

C@MPUS

[...]

Status within Curriculum

[^ My Degree Programmes](#)

Electrical Engineering and Information Technology - Bachelor of Science (1590 82 048 1), 048-2016

▼ Core Modules / Electrical Power Engineering / Lecture: Eletricial Power Engineering II

Subject type Compulsory subject | **Recommended** 3rd semester

Registration for 'container'/combination modules

- for modules containing several courses, register in the semester in which you will finish **all** parts (e. g. some 6-CP elective modules such as “Spoken Language Understanding”)
- module grade = average of course grades

Official registration for modules

- **binding** registration for modules in C@MPUS: usually open for 3 weeks each semester
- registration is **only** possible during the registration period; otherwise grades and CPs will **not** be entered into C@MPUS (screenshot/download of (de-)registrations recommended; examination office and examination board are very strict about this)
- no need to register for Key Qualification modules now
- no need to register for the Research Module CL (will be done separately)
- right of academic accomodation (email exam board)
- hint: also register for modules if you plan to but you're not sure you'll be able to attend the exam

To keep in mind: de-registering modules

- check the 'exam type' of the modules in the module description/handbook (via C@MPUS – Search – degree programmes – book icon):
 - **LBP** = *lehrveranstaltungsbegleitende Prüfung* (several tests, presentation, project)
 - **PL** = *Prüfungsleistung* ('real' exam)
 - **BSL/USL** = *(un)benotete Studienleistung* ('test'; (un)graded)
- you can withdraw from an **LBP** module registration only until the end of the respective registration period
- you can withdraw from a **PL** module registration until 7 days before the respective exam takes place (otherwise, a medical certificate is needed as soon as possible for the exam not to be counted as "failed")
- you can leave **BSL/USL** module registrations open without consequences
- de-registrations can be done online for some of the modules, with a form for others (see C@MPUS)

Dropping & repeating modules

- failed examinations can be repeated once (without consequences); re-registration is necessary!
- a second repetition of a module exam (if exam='PL'/'LBP', see module description) is only allowed for 2 modules in total during your BSc studies, 3 for MSc
- if you fail the second written repetition of a module exam (if exam='PL'), there is a last oral exam (only pass/fail)
- CL: 2 failed modules can be dropped (informal declaration with the examination office)

Please note: Any kind of plagiarism can be a reason for failing exams.

STEP 1: Registration in C@MPUS

C@MPUS

Find the module in the module tree (if you don't find it, let me know)

- [-] ▲ [200] Core Modules
 - [+] M [11480] Electrodynamics
 - [+] M [11500] Electrical Power Engineering
 - [+] P [11501] Power Engineering I
 - [+] P [11502] Power Engineering II

Lectures and Examinations in academic year	2020/21	Part	Lecturer (Assistant)	Place (1st session)	
1150200000	20W	05H	EX	Power Engineering II	
[+] V [115001]	Lecture: Electrical Power Engineering I				
[+] V [115002]	Exercise: Electrical Power Engineering				
[+] V [115003]	Lecture: Eletricial Power Engineering II				
[+] V [115004]	Exercise: Electrical Power Engineering II				

register for examination

If there are 2 module exam nodes/parts (P), register for both!
NB: The course lecturer can be different from the module examiner.

Check C@MPUS

C@MPUS

Exams you are registered for by 24.11.2020 12:06

No. 	Sem. 	ID of Programme 	Type 	Title 	Registration status 	Examiner 	Date 	Place 	Deregistration until 	Operations

STEP 2: Course-module mapping

- some courses can be used in several different modules – your choice
- C@MPUS doesn't allow (yet) making the link between your course registrations and your module registrations, but we need this mapping for entering your grades
- obviously, each course can be counted only once – we'll check this before entering your grades and CPs into C@MPUS

Course-module mapping table in ILIAS

- All MSV and CL (and others) students need to enter their mappings into their respective course-module mapping table **until the end of the registration phase**.
- *Magazin – Ingenieurwissenschaften – Maschinelle Sprachverarbeitung / Computational Linguistics – **Arbeitsgruppen – Studying @ IMS***

Example: course-module mapping table in ILIAS

my course-module mapping

In this table, IMS students (all BSc MSV & MSc CL who have started in SS19 or later) have to indicate which elective courses they used in which modules (only for cases where there is no 1-to-1 mapping, i.e. where the course title is different from the module name). This information is needed to enter your grades and credit points into C@MPUS (there, this information cannot be made explicit).

Content Info Settings Tables Export Permissions

Your data is only used for internal purposes, see also <https://www.uni-stuttgart.de/en/privacy-notice/>.

(1 - 41 of 41)

Rows ▾ View ▾ Export ▾

last name	first name	matriculation number ↑	course title	degree program	course taken in semester	lecturer's name	module name (number of CPs)	module registered in semester	comment	Actions
TEst	TEst	234523	dnhydetc	MSc CL	SS19	fhnf	fhz	SS19	fhzmfz	Actions ▾
MyLastName	MyFirstName	1234567	Hot and Odd Topics in Semantics	MSc CL	SS19	Michael Roth	Project Seminar Computational Linguistics (6 CP)	SS19		Actions ▾

Also use this for filling “Methods in CL” with 2 advanced courses (for CL graduates).

Additional hints

- some students have to fulfill conditions / requirements (*Auflagen*)
 - check in your original admission letter if yes or no
 - recommended taking the oral exam as soon as possible
 - if you want to do it this semester, register now in C@MPUS for your requirements module
 - more information in ILIAS: *Magazin – Ingenieurwissenschaften – Maschinelle Sprachverarbeitung / Computational Linguistics – Arbeitsgruppen – Auflagenmodul**
 - we'll contact you after the end of the registration period with more organizational details

In case of any individual questions ...

... concerning your studies, please ask:
