

University of Stuttgart
Germany

**FIGURES
DATA
FACTS**

2016

Dear reader

In this booklet “Figures Data Facts” we are again providing a diagnosis on the performance record of the University of Stuttgart for the past year. Our University has also made itself visible in many fields and continued to grow dynamically over the past year. These successes have been compiled here in a transparent and compact form and can be viewed in numerous tables and charts.

The statistics published in the annual report clearly document our progress. Nevertheless, these numbers only partially illustrate the dedicat-

ed commitment demonstrated by members of the university. Passion and drive by many individual parties succeeded in moving the whole University forwards.

In the “Stuttgart Way” of integrated and linked actions we will also be emphatically pursuing our strategic goals in future as well. We have undertaken with international commitment to enhance our reputation as a research university with global recognition, to improve the appeal for talented students, to act as an active partner in knowledge and technology

transfer and to fortify our reputation as a reliable employer for employees and scientists.

This annual report only portrays a partial medium in our information concept that we also optimised further in the past year adhering to the motto, "Communication creates trust and loyalty".

That is why we are cordially inviting you to also carry on reading our widely acclaimed university magazine FORSCHUNG LEBEN, our information brochures as well as our diverse inter-

net range in order to learn interesting facts about the University of Stuttgart and to get in touch with us.

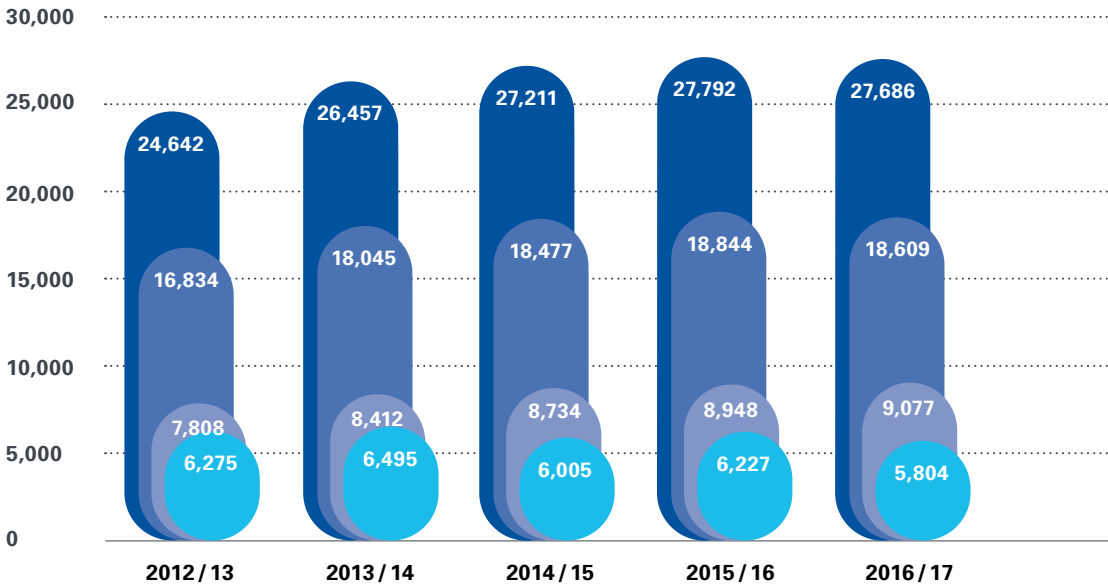

I wish you an interesting lecture.

Yours

A handwritten signature in black ink that reads "Wolfram Ressel". The signature is written in a cursive, flowing style.

Prof. Dr.-Ing. Dr. h.c. Wolfram Ressel
Rector of the University of Stuttgart
